

EMERGENCY STORAGE BUFFER VTR 4PL 2H

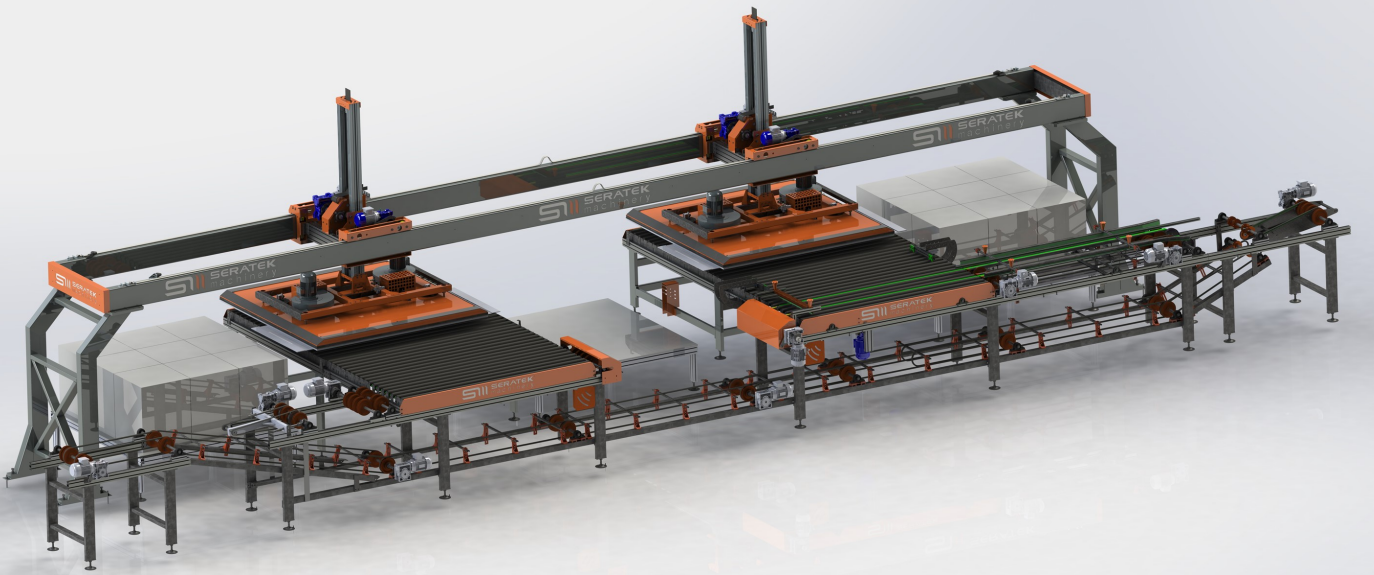

EMERGENCY STORAGE BUFFER 4PL 2H

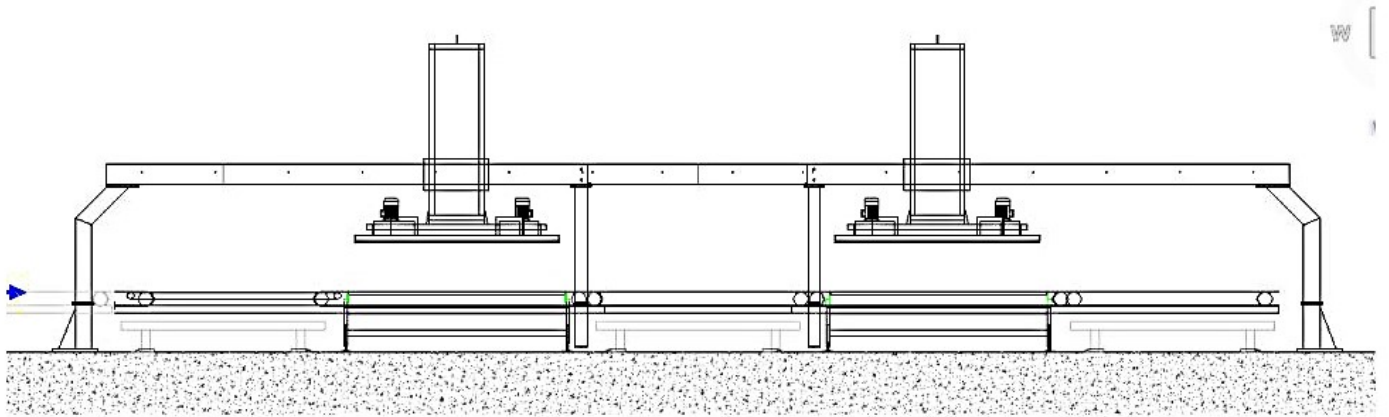

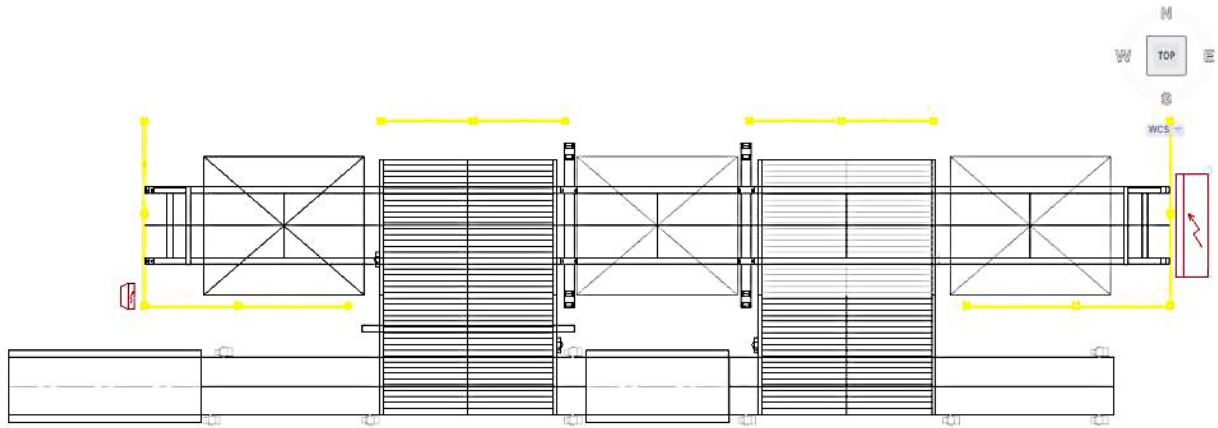

APPLICATION

Machines used when kiln exit, squaring line and quality sorting lines are connected together, to take tiles on the storage platforms when there is a stoppage and feed back when the system begins to work or to take the tiles on storage platforms continuously and feed back continuously.

EMERGENCY STORAGE BUFFER VTR 3PL 2H

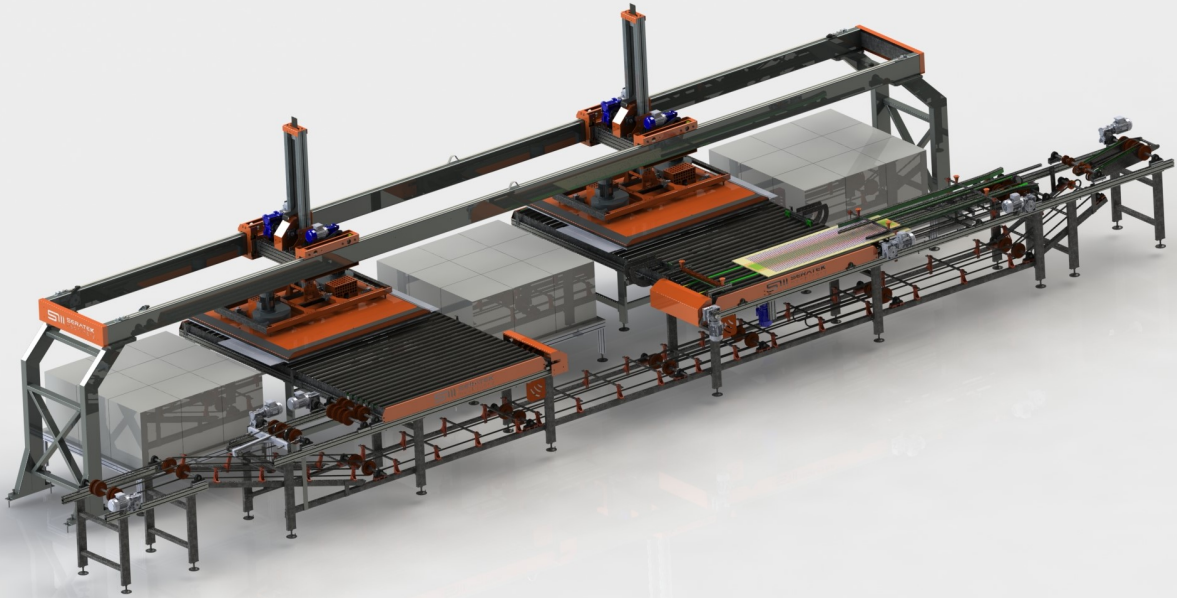

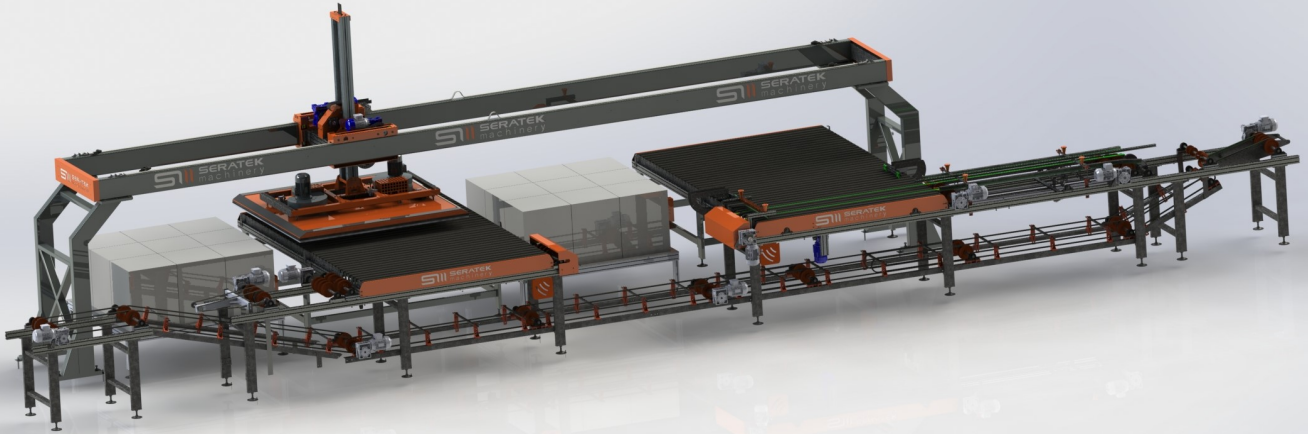

EMERGENCY STORAGE BUFFER VTR 3PL 2H

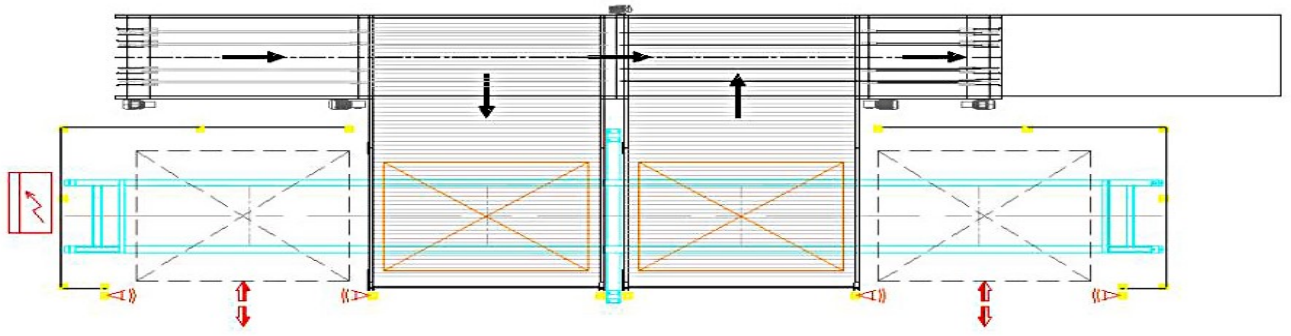

APPLICATION

Machines used when kiln exit, squaring line and quality sorting lines are connected together, to take tiles on the storage platforms when there is a stoppage and feed back when the system begins to work or to take the tiles on storage platforms continuously and feed back continuously.

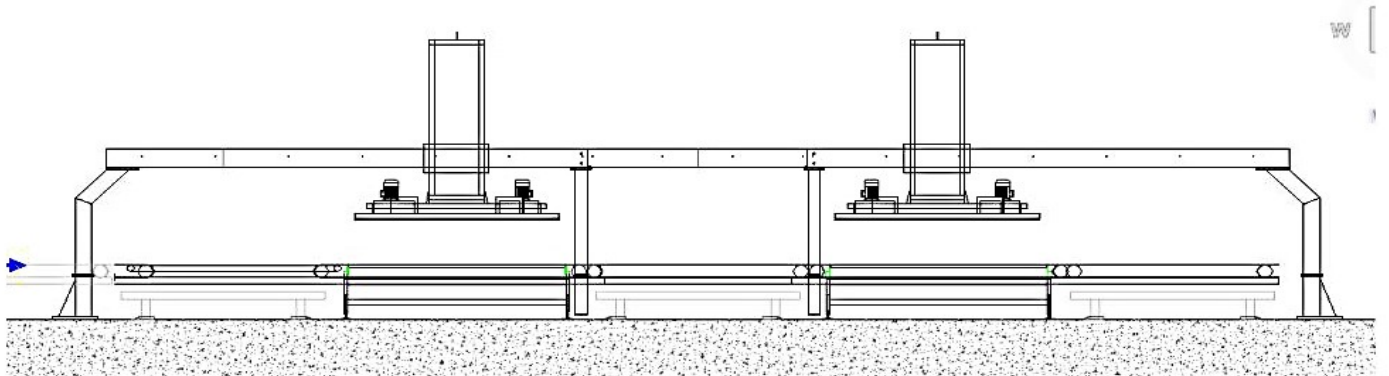

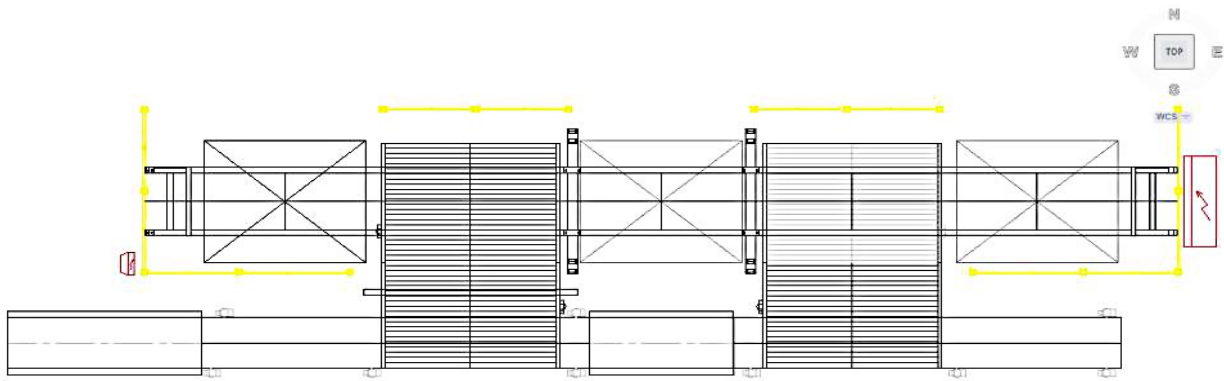

DIFFERENT SOLUTIONS

DIFFERENT SOLUTIONS

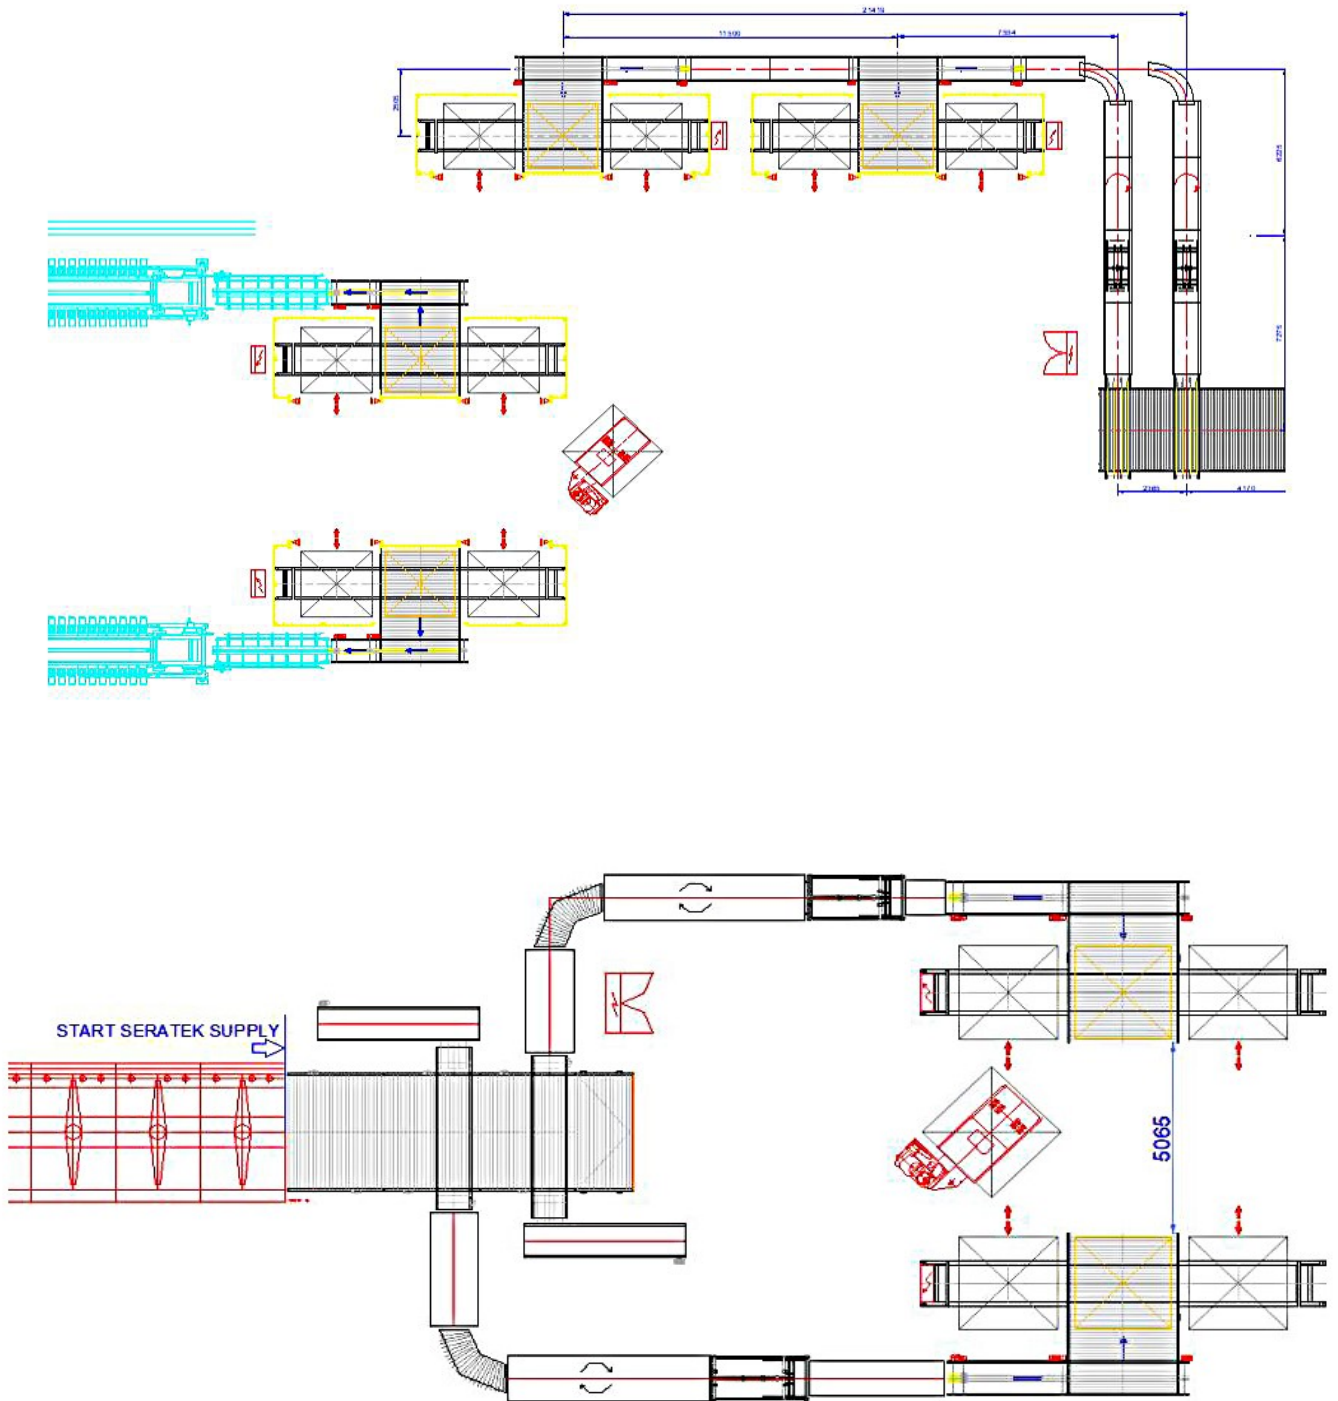

SERATEK - VTR - BUFFER

APPLICATION

Machines used when kiln exit, squaring line and quality sorting lines are connected together, to take tiles on the storage platforms when there is a stoppage and feed back when the system begins to work or to take the tiles on storage platforms continuously and feed back continuously.

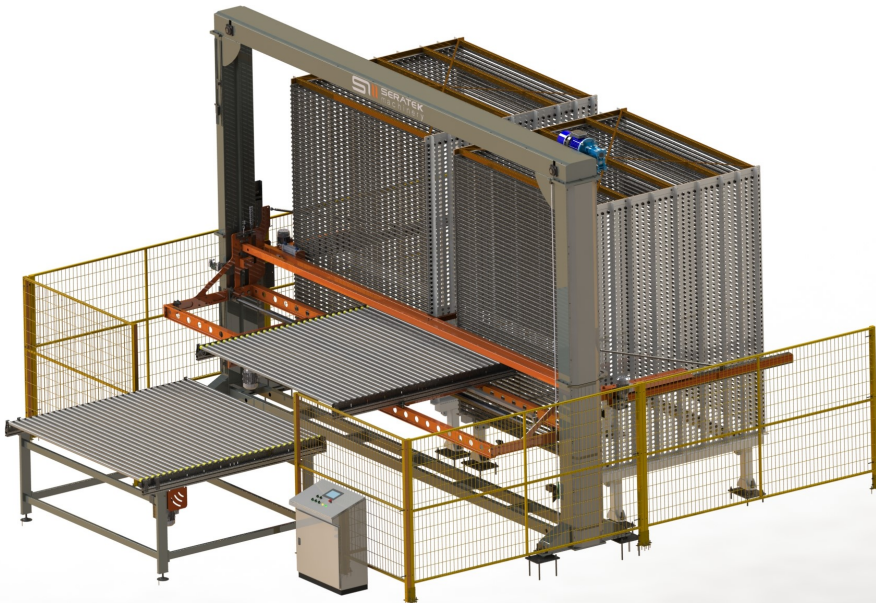

VACUUM LOADING UNLOADING MACHINE VTR 2PL 1H

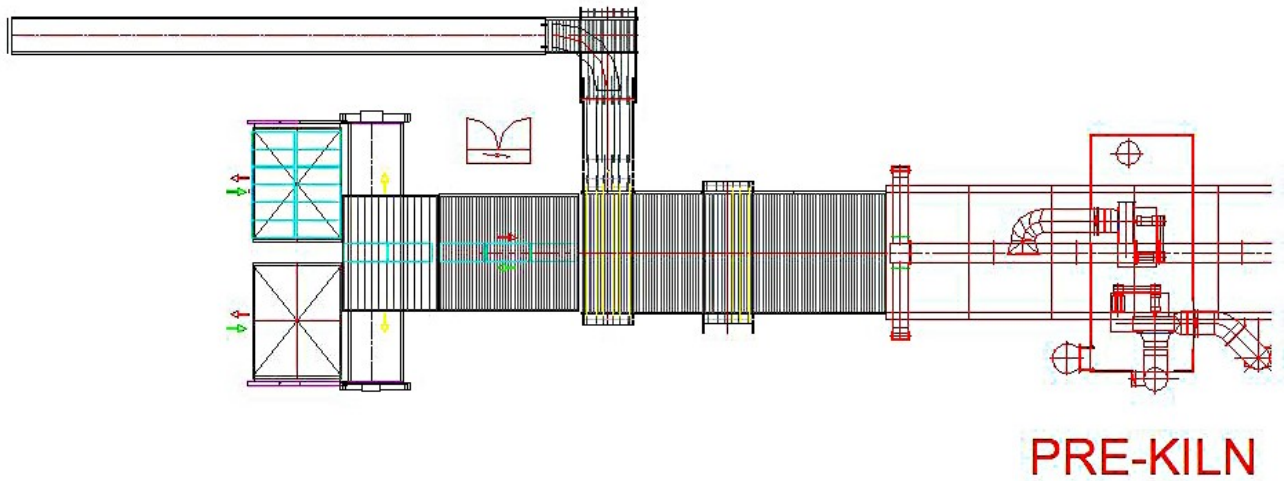

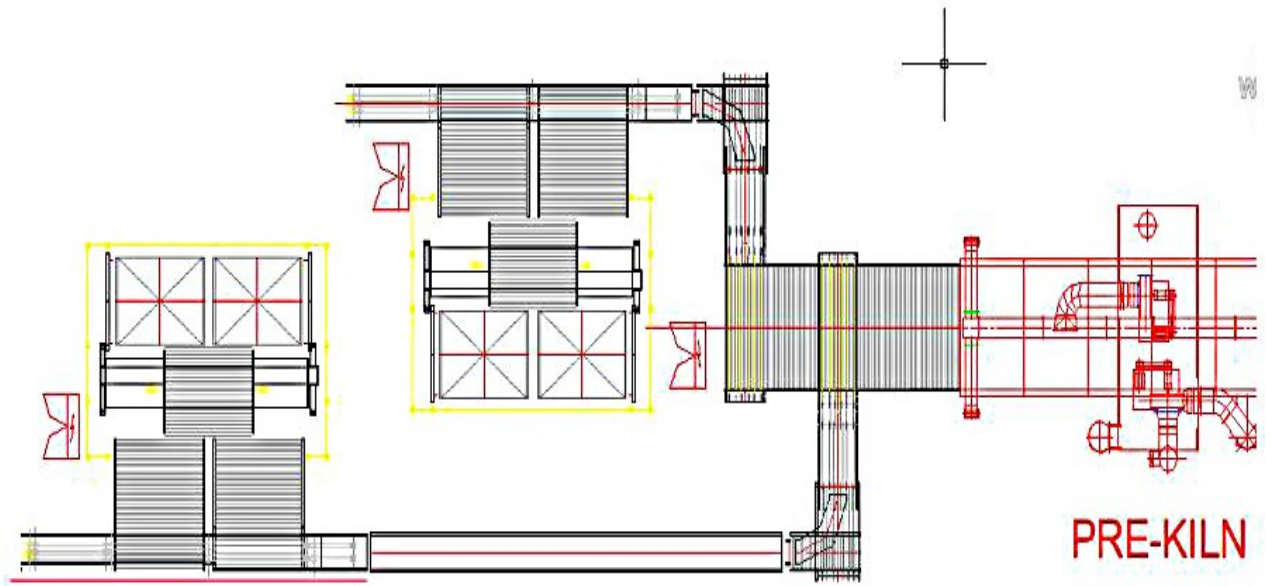

APPLICATION

Machines used when kiln exit, squaring line and quality sorting lines are not together, to take tiles on the storage platforms and feed back continuously.

ROLLERBOX STORAGE SYSTEMS

ROLLER BOX STORAGE SYSTEMS

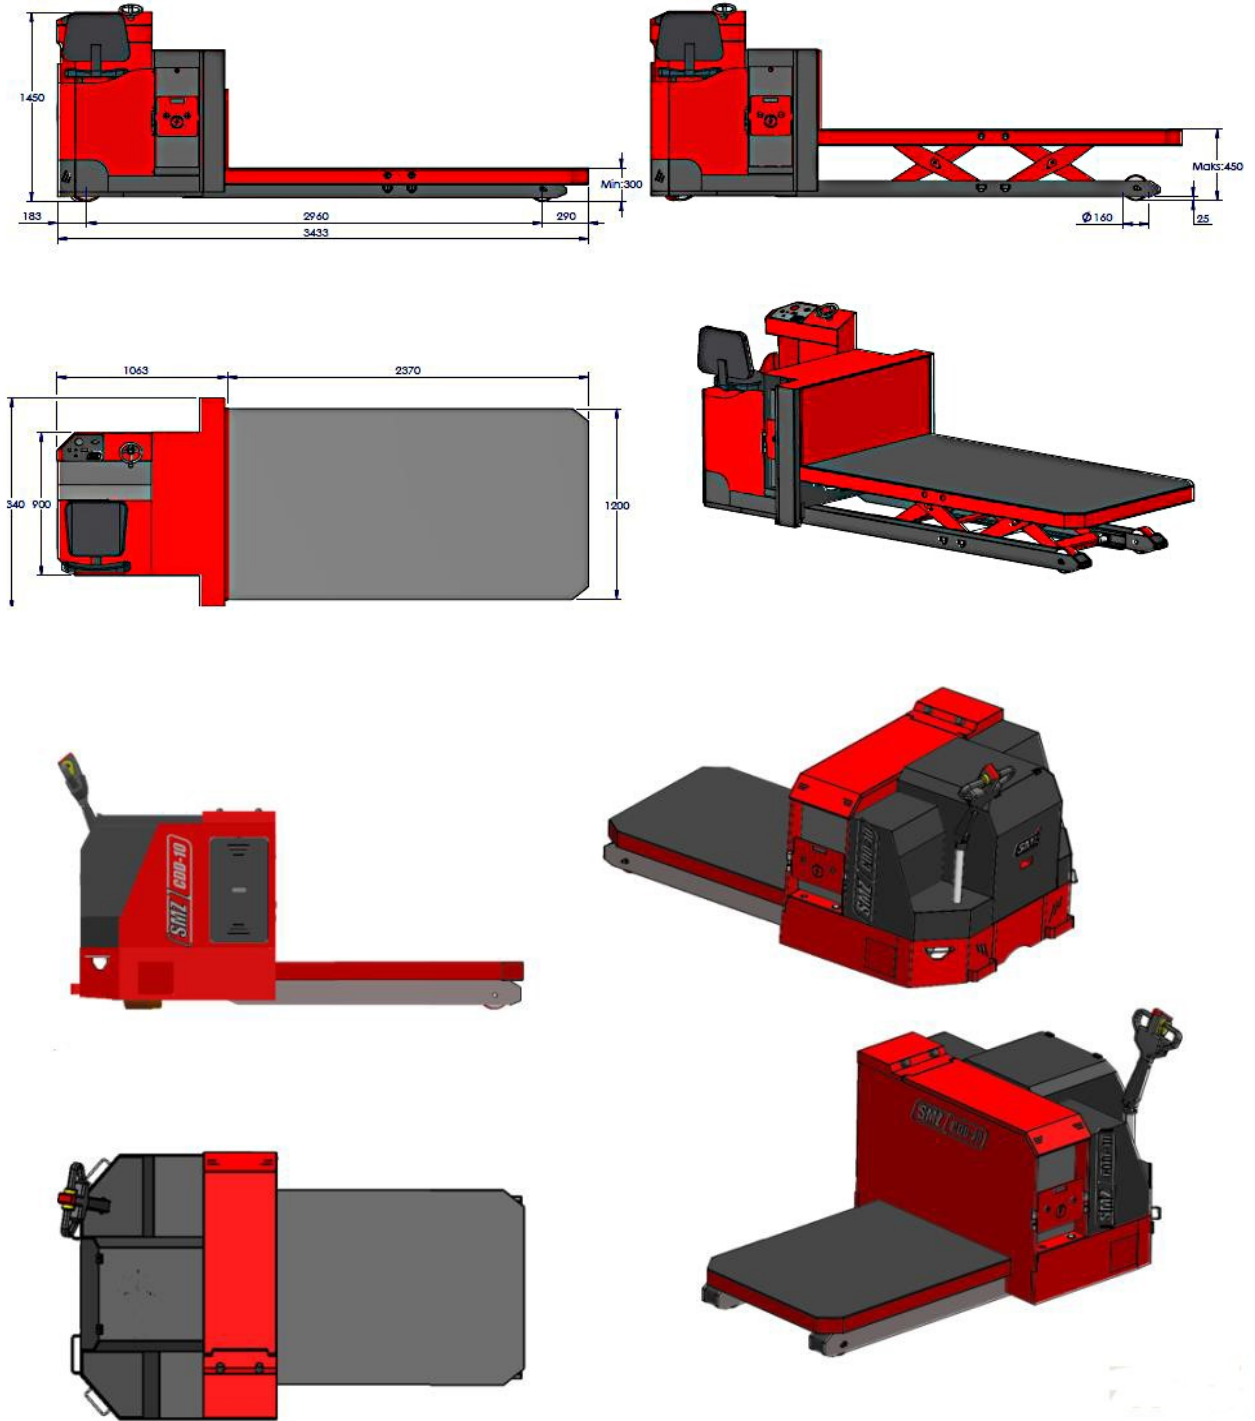

APPLICATION

Machines used when glazing lines and kiln are connected directly, to make storage while glazing line is working and feed the kiln when glazing line stops to keep the kiln always working.

PLATFORM CARRIAGE SYSTEMS

PLATFORM CARRIAGE SYSTEMS

APPLICATION

Machines used to carry storage platforms at the exit of the kiln, operated manually operatör sitting on the vehicle. Automatic Vehicles can be Laser Guided or Magnetic Guided .
